

Yuga Spark — SEO & Discoverability Setup

Complete setup report for search engine optimization and AI platform discoverability

Project: yuga-spark.vercel.app

Date: 1 October 2026

By: Hemanth

FILES CREATED

3 new files

FILES MODIFIED

2 files

PLATFORMS SETUP

Google, Bing, AI

SEO ISSUES

0 remaining

1 Google Search Console

✓ VERIFIED

Registered the site with Google so it appears in Google Search results.

Method: URL prefix → HTML meta tag verification

```
<meta name="google-site-verification" content="dS3aoc7taWTbSLTwI-qKM8PVOq81WDLAjZY5nxB5CtQ" />
```

Actions completed:

- Added verification meta tag to `index.html`
- Deployed to Vercel → Ownership verified ✓
- Submitted `sitemap.xml` → **3 pages discovered**, Status: **Success**
- Requested indexing via URL Inspection

2 Sitemap & Robots.txt ✓ LIVE

Created a sitemap for search engines to discover all pages, and robots.txt to control crawling.

Sitemap (`public/sitemap.xml`):

URL	Priority	Change Frequency
<code>/</code> — Homepage	1.0	Weekly
<code>/achievements</code> — Club Legacy	0.8	Monthly
<code>/auth</code> — Sign In	0.3	Yearly

Robots.txt (`public/robots.txt`):

Status	Routes
 Allowed	<code>/</code> , <code>/achievements</code> , <code>/auth</code>
 Blocked	<code>/dashboard</code> , <code>/admin</code> , <code>/profile</code> , <code>/onboarding</code> , <code>/chat</code> , <code>/playbook</code> , <code>/squads</code> , <code>/leaderboard</code> , <code>/notices</code> , <code>/certificates</code> , <code>/badge</code>

3 SEO Meta Tags & Open Graph ✓ LIVE

Added comprehensive meta tags to `index.html` for search engines and social media link previews.

Category	Tags Added
Basic SEO	<code>description</code> , <code>keywords</code> , <code>author</code> , <code>theme-color</code> , <code>canonical</code>
Open Graph	<code>og:type</code> , <code>og:url</code> , <code>og:title</code> , <code>og:description</code> , <code>og:image</code> , <code>og:site_name</code>
Twitter Card	<code>twitter:card</code> , <code>twitter:title</code> , <code>twitter:description</code> , <code>twitter:image</code>
Noscript Fallback	<code><h1></code> , <code><p></code> , <code><nav></code> inside <code><noscript></code> for non-JS crawlers

Enables rich previews on: Facebook, LinkedIn, WhatsApp, Discord, Slack, Twitter/X

4 Bing Webmaster Tools ✓ VERIFIED

Registered the site with Bing so it appears in Bing and Microsoft search results.

Method: Imported directly from Google Search Console (one-click)

Verification result (Live URL Inspection):

- ✓ URL can be indexed by Bing
- ✓ No SEO/GEO issues found
- ✓ 1 Markup type detected

5 AI/LLM Discoverability ✓ LIVE

Created `llms.txt` files so AI platforms (ChatGPT, Claude, Perplexity) can understand and reference the site.

File	Purpose	Live URL
<code>llms.txt</code>	Concise site overview for AI crawlers	yuga-spark.vercel.app/llms.txt
<code>llms-full.txt</code>	Detailed context — all pages, features, tech stack	yuga-spark.vercel.app/llms-full.txt

AI bots allowed in robots.txt:

- GPTBot, ChatGPT-User (OpenAI)
- Claude-Web (Anthropic)
- PerplexityBot (Perplexity AI)
- Bytespider (ByteDance)
- CCBot (Common Crawl)

Files Changed Summary

File	Action	Purpose
<code>index.html</code>	Modified	GSC verification, SEO meta tags, OG/Twitter tags, noscript H1 fallback
<code>public/sitemap.xml</code>	Created	XML sitemap with 3 public pages
<code>public/robots.txt</code>	Modified	Crawler rules + AI bot rules + sitemap reference
<code>public/llms.txt</code>	Created	Concise AI/LLM site overview
<code>public/llms-full.txt</code>	Created	Detailed AI/LLM site context

⌚ Expected Timeline

Milestone	Expected
Bing re-crawl (with H1 fix)	1–3 days
Google first crawl	1–3 days
Site appearing in Google search	3–7 days
Site appearing in Bing search	3–7 days
AI platforms referencing site	Varies by platform

⚠ **Important:** Do NOT remove the `google-site-verification` meta tag from `index.html` — it must stay permanently to keep Google Search Console verification active.
